

# Lufkin®

## MEASURING EQUIPMENT

For over a century the name of Lufkin has been associated with quality measuring tools. Lufkin short, long, pocket and special purpose tapes are joined by a host of other products matched to the need of the architect, surveyor, home craftsman, carpenter – in fact, anyone who measures. Lufkin was appointed official supplier of measuring tapes to the 1976, 1980, 1984, 1988 and 1992 Olympic Games, the 1978, 1982, 1990 and 1994 Commonwealth Games. Lufkin has had Official Status in numerous meets in the South Pacific, Caribbean and South America.

All Lufkin brand pocket tapes, up to and including 10 metre, manufactured at the Albury plant, are 100% inspected against a Bench Standard. The Bench Standard No. WO 4459 is traceable to an American Standard NBS 13785. This Standard exceeds Australian Standard AS 1290-4-1995, with regard to accuracy.

Many Lufkin products  
are licensed Australian

## Measuring Tapes Ultimate & Ezy Read

### ULTIMATE TAPES

All new easy to read white tapeline

#### Features

- Fully Guaranteed
- Accurate Measurement - complies with AS 1290-4 1995. In an easy to read black and red print on an all new white tapeline.
- Case designed to fit the hand
- Strong A.B.S. plastic case
- Sliding end hook automatically adjusts for inside and outside measurements
- Built-in shock absorbing bumper
- Positive non-slip blade lock
- Bright, distinctive colours - Hard to lose.
- Removable belt clip

#### Anti-Theft "CLIPLOK"

The anti-theft "Cliplok" is designed as a pilfer resistant feature to deter the would be, in-store thief from removing the valuable Lufkin stock from the hang-up card, to a belt or pocket. With patent pending, the unique anti-theft "Cliplok" is cleverly designed to work in two ways:

1. With a section of the extra strong hang-up card slotting back inside the top of the belt clip, thereby restricting the removal of the tape from the card, and
2. A circular die-cut section folded back inside the belt clip, again assisting restriction in removal. Both acting as a deterrent for possible in-store theft.

### EZY-READ™

#### Features

- Ezy-Read Tapeline Each numeral on the tape is totally distinct from other numbers. This enables excellent definition and makes it difficult to misread the measurement.
- Perfect for measuring applications where the tape is directly away from the operator, such as vertical measurements or measuring long objects or items.
- Compatible with either left or right handed operation.
- World leading printing technology giving even greater accuracy.

#### SHORT TAPES

Blades are finished with 'Lufkote', a transparent, abrasive resistant coating for durability and long life.

All yellow clad blades have an added matt finish which reduces glare and permits the user to write on the surface with a pencil and erase easily by rubbing with the finger.

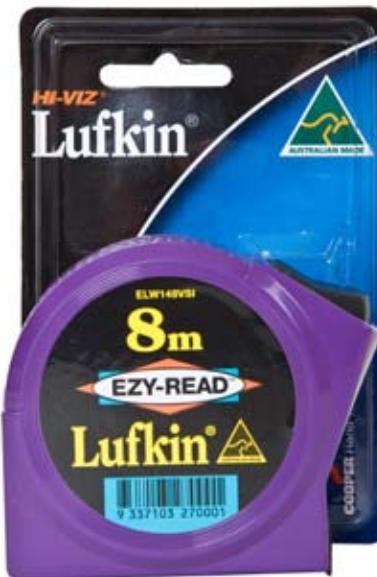

Bold two colour markings make for easy reading. Self-adjusting end hooks. Metric, Metric/English and English blades with refills available on most models.

#### Short tapes – Prefixes

- C – Chrome clad  
R – Replacement blade  
Y – Yellow clad

#### Suffixes

- SI – System International, all metric graduations  
M – Metric graduation  
ME – Metric/English graduations, millimetre numbering  
CM – Metric graduations, centimetre numbering  
CME – Metric/English graduations, centimetre numbering  
D – English graduated feet and decimal feet along one edge, feet and inches along other edge  
PM – Metric diameter  
PD – English diameter

Lufkin tapes and rules are manufactured to comply with Standards of the Standards Association of Australia.

Standard temperature for steel tapes is 20°C (68°F).

Coefficient of expansion for steel tapes is 0.0000116 per degree Celsius/0.00000645 per degree Fahrenheit.

Standard tension for most long steel tapes, when fully supported throughout their entire length, is 50N (10lbs for English only tapes).

Surveyor's tapes of heavy gauge steel have a standard tension of 75N (10lbs. for English up to 100 ft. long and 20lbs for English over 100ft long).

Standard tension for Dacron and Fibreglass long tapes is 20N/4 lbs.

We cannot guarantee the accuracy of tapes used in catenary as many factors affect the use of tapes in this manner.

All Lufkin steel tapes have clear Lufkote protection to provide wear and corrosion resistance.

Lufkin brand metal long tapes, up to and including 50 metre, are manufactured and inspected to Canadian Government Specification Board Standard 39-GP-22M.

Compliance to Clause 5.3.3.7, Accuracy, of the above Standard is inspected against Bench Standard WO-304-4 which is traceable.

Tapes complying with 39-GP-22M will also comply with AS 1294-1980, Coated and Etched Steel Measuring Tapes.

## Calibrated Measuring Tapes

Y838SIC	8m x 19mm - supplied in red Unilok style case.	■ 260507	1
---------	--	----------	---

The uncompromised quality for which Lufkin is renowned is further exemplified through their certified measuring tapes.  
These tapes have been thoroughly checked against a traceable national standard, quoting variations from nominal readings.  
Each tape is serial numbered and is cross referenced on the certificate of calibration.

## Measuring Wheels

Lufkin measuring wheels are calibrated to the digital indicator for accuracy. Their flexibility makes them useful on horizontal, vertical, even curved surfaces. Moulded rubber tyres resist corrosion while the tough plastic wheels withstand heavy use for a long service life. Telescoping handle height is comfortable for most users.
